Moved by Mr. Smallwood that Council offer the Soldier Settlement Board \$25.00 per acre for .07 acres of land taken from N.W. quarter of 2-46-7-4 this to include all expenses in connection therewith. Cd.

Moved by Mr. Burton that appeal of the Red Cross for funds be disallowed as appropriations for the year have been made and money spent. Carried.

Moved by Mr. Smallwood that Secretary reply to Van Allen, Simpson & Co. giving them the information requested. Cd.

Moved by Mr. Smallwood that account of T. Colby be tabled until next meeting for further information and report from Mr. Dietrich and Mr. Santee. Cd.

Moved by Mr. Burrell that the following accounts be passed and paid.
Imperial Lumber Co.—Material \$21.60
H. Knudson — Labor 8.00
E. E. Sharkey — Labor 5.00
John Baksa — Labor 6.65
R. B. Caslick — Labor 10.50
Irma Times — Papers 24.00
M. K. McLeod — Repairs 129.60
Irma Motors — Lights 1.50
Western Mun. News — Supplies 9.86
E. E. Torsy — Repairs 17.75

Carried
Moved by Mr. Burton that this Council appoint Dr. W. B. Murray, Medical Health Officer for the Municipality, he to be paid for services rendered. Cd.

Moved by Mr. Santee that this Council have a by-law drawn up for a herd-law in division 3, the boundaries of which is, south line between townships 43 and 44, range 9, on the east range line between ranges 8 & 9, on the west range line between ranges 9 & 10 and on the north by Government road in township 45, range 9. Cd.

Moved by Mr. Santee that this Council set the number of signatures of resident electors requisite for a petition to elect a herd law to a vote of the ratepayers at 20 in either division 1 or 3. Cd.

Moved by Mr. Smallwood that Wm. Masson be appointed bailiff for the municipality for the remainder of 1928 and 1929. Cd.

Moved by Mr. Santee that Secretary notify all owing the municipality for seed grain to be at the Municipal Office on Tuesday, the 16th of October 1928 at 2 o'clock P.M. to meet a committee of the Council and that those failing to appear, their indebtedness will be given to the bailiff for collection. Cd.

Moved by Mr. Smallwood that Mr. Fisher and Mr. Santee be appointed on Seed Grain committee. Cd.

Moved by Mr. Burton that Mr. Smallwood be appointed on Seed Grain committee. Cd.

Moved by Mr. Smallwood that this Council offer for sale the N. W. quarter of Section 22-45-9-4 and the S. E. quarter of Section 4-45-7-4 on the 11th day of December, 1928, at the Municipal Office, Irma, Alberta, at the hour of 2 o'clock P.M. Cd.

Moved by Mr. Burton that Secretary be instructed to take title to all lands on which a 1926 Caveat is registered, that has not been redeemed. Carried.

Moved by Mr. Smallwood that Council adjourn. Cd.

Leighton McCarthy, K.C., a Toronto lawyer and financier, said in a speech delivered in Calgary that the Wheat Pool was Canada's largest commercial undertaking, and remarked that Western farmers appear to be realizing the advantages of close organization.

If you have something valuable that you don't want and somebody else can use it, an ad. in this paper will sell it for you. Try it.

CHURCH NOTICES AND ACTIVITIES

CHURCH NOTICES
Sunday, October 14th, 1928
Irma, Bible School — 11 A.M.
Sermon — 7.30 P.M.
Ross — 11 A.M.
Alma Mater — 2 P.M.
Roseberry — 3.30 P.M.

"Does it matter whether we believe in God or Not?" Do we believe that "God satisfies the longing soul?" If not does it matter?" Hear this discussed next Sunday evening by the pastor.

Church School 11 A.M.
Is for everybody—come. "Where there's a will there's a way," we can always do what we want to do. If we consider the study of the Bible together, important, we will not make the excuse that 11 A.M. is too early.

Last Sunday around seventy studied the lesson on the life of Paul as a missionary. Next Sunday the thirteenth chapter of first Corinthians, on the supremacy of love, one of the most beautiful chapters in the Bible will be studied.

"All the flowers grow by light,
All the virtues grow by love."

It is expected that five or more delegates will attend the Young People and Leaders' Conference in Viking this week end and that a number of carloads will go for Saturday, all day, taking in the Banquet at 6 P.M.

The Mission Band was held at the home of Mrs. Shaw on Friday. The Executive of the Church School regrets very much the loss of a faithful and efficient teacher in the person of Mrs. Lennon who is leaving for B. C.

The photographs taken of the school September 23rd were given those with best attendance and memory work, since January 1st. Others desirous of securing some may order from the drug store. Twelve new books have been added to the library. The one who first reads the twelve will receive a new book entitled "Blazing the Trails" by Archer Wallace.

On September 28th, the C. G. I. T. met at the United Church at 7.30. Then we went over behind Mr. Locke's house where we built a large camp fire prepared to light. This was soon going in fine style. The meeting was opened with a sing song. Then our Dedication Ceremony began, and Mrs. Locke told us a story of three girls' lives. After the ceremony was completed the minutes were read and business brought up. With business off the boards we toasted marshmallows and popped corn, and after playing a few games we sang "Taps."

ANGELIC CHURCH
Harvest Thanksgiving service next Sunday, October 14th at 11 a.m. in Masonic Hall.
Rev. A. M. Trendell,
Wainwright Vicarage)

COAL SPRINGS RESIDENT PASSED AWAY IN CITY

Word reached Irma Tuesday that Mr. Fritz Rupe, an old timer of the Coal Springs district had passed away suddenly from heart failure in Edmonton on Monday. The late Mr. Rupe, who was in his 61st year, had lived in the Coal Springs district for around twenty years and had made a success with his homestead. About six weeks ago he decided to retire from farming and went to Edmonton where he purchased a rooming house. As soon as word reached Irma of his death, Mr. H. Kasten, whose farm adjoins the deceased, left for Edmonton to arrange for his funeral and look after any other affairs.

ASH-BARNES

At the United Church Manse, Wednesday afternoon, October 10th, Rev. Mr. M. L. Wright officiated at the wedding of Miss Mary Barnes, daughter of Mr. and Mrs. James Barnes, of Viking, and Mr. Robert W. Ash of Viking. Miss Grace Barnes, sister of the bride, assisted. After the ceremony the wedding party left for Red Deer to visit a sister of the groom after which they will make their home on the groom's farm southwest of Viking.

"You're late, as usual," said a local lady to her husband when he came home last night. "But I've got an absolutely new reason, my dear," he replied.

POPULAR YOUNG COUPLE MARRIED

On Wednesday, October 10th the home of Mr. and Mrs. James Fenton of Irma, Alberta was the scene of a pretty and popular wedding, when their second daughter Inez Margaret was united in marriage to Ralph Harley Dunlop, youngest son of Mr. and Mrs. Wm. Dunlop of 10742, 108th St., Edmonton.

The bride who was given in marriage by her father, entered the parlor to the strains of the Bridal March played by Mrs. M. L. Wright A.T.C.M. of Irma.

The bride was charmingly dressed in white crepe-de-chene over satin, with wedding veil of white silk net held in place by orange blossoms. She carried a bouquet of pink tea roses, Valley lilies and maiden hair fern. Miss Georgina, sister of the bride acted as bridesmaid and looked lovely in maize georgette trimmed in ermine, carrying a bouquet of maiden hair ferns and maiden hair fern. Little Rena Fenton as flower girl was dressed in peach velvet and carried a basket of pink carnations and fern. Mr. Gordon Fenton, brother of the bride supported the groom.

The bride's mother chose tulle sash back crepe trimmed with touches of blue and silver.

Mr. M. L. Wright of Irma performed the ceremony. The rooms were tastefully decorated with streamers and wedding bells in white and maize. During the signing of the register Mrs. Wright sang "O Perfect Love" accompanied by her daughter Miss Vileta.

Following congratulations a second ceremony in the form of a christening took place when the infant son Ernest Eugene, of Mr. and Mrs. E. W. Carter, and nephew of the bride, was baptized.

A delicious buffet luncheon was served. Mrs. White, Mrs. Magee and girl friends of the bride assisted. The bride's going away costume was a modish dress of red charman under a coat of Hudson seal, the gift of the groom, and she wore a black plush hat trimmed with touches of silver. The bride's gift to the groom was a pair of gold cuff links. The groom's gift to the bridesmaid was a pierced silver candy basket, to the flower girl a boudoir clock, to the best man a fountain pen and to the soloist a Dutch silver cuff container.

Besides about twenty relatives and friends of the neighborhood the out of town guests were: Mr. and Mrs. William Dunlop, Mrs. D. Ingram, an aunt of the groom, Mr. Ernest Dunlop, a brother, of Leduc, Alberta, Mrs. F. W. White and Mrs. H. S. Magee, aunts of the bride, both of Stettler, Alberta, Mr. and Mrs. Robert Shears (nee Miss Alma Ross R.N.) of Lamont, Miss B. Langster and Miss Chiyu Kubo, R.N. one of the celebrated Japanese nurses of Lamont.

The many and beautiful gifts were indications of the esteem in which the young couple were held as was the long distance telephone call to the bride, just after the service, from Rev. C. W. W. Ross of Lamont.

They left by train for a honeymoon to Prince Rupert, Vancouver, Seattle and other points. On their return the happy couple will make their home in Indian Head, Sask., where the groom has a position with the Dominion Forestry Dept. Their wide circle of friends wish them all happiness and prosperity, their only regret being that they are not making their home in Irma.

FRANK PETERSON HOME FROM TOUR OF STATE FAIRS

Mr. F. Peterson has returned after attending several important fairs in the Central States with the provincial government exhibit and reports that a very hearty reception was tendered them at each fair visited. A lot of enquiries were made about the opportunities in Alberta, he is positive that the publicity given the province will result in a lot of advertising that could not have been accomplished in any other way. During his absence he visited the following fairs: Missouri State Fair at Sedalia, August 18th to 25th; North Central Kansas Free Fair at Belleville, Kansas, August 27th to 31st; Tri County Fair Kansas at Holden Sept. 10th to 15th; Kansas State Fair at Hutchinson, Kansas, Sept. 15 to 21st; State Fair Lincoln, Nebraska four days; Kansas Free Fair at Topeka, Sept. 10th to 15th.

TO GATHER FOR BIG CONFERENCE

Young Peoples Conference.

Friday, October 12th—

4 P.M.—Conference of Leaders in White Church.

7.30 P.M.—United Church Hall. Registration and Election of Officers followed by Joint Session. Address by Mr. Gordon Lapp.

Saturday—

9 A.M.—United Church's Hall Service of Worship.

9.30 A.M.—Group Discussions.

11 A.M.—Reports of Discussion Groups.

Afternoon Recreation.

6 P.M.—Banquet in Church Hall. Sing, Song, Stunts, Yells, Toasts.

Address by Miss Mabel Nix.

Sunday, October 14th—

11 A.M.—Church School for all ages

3 P.M.—United Church—Joint Rally of girls, boys, leaders, and parents

Addresses by Miss M. Nix and Mr. Gordon Lapp.

Church Hall—Round Table Conference for Young Peoples Organizations led by Rev. R. W. Hibbert.

7 P.M.—Church Worship under auspices of Young Peoples Conference. Speaker, Rev. R. W. Hibbert. Music led by Orchestra.

There will be delegates present from several neighboring towns. All local young people are particularly urged to attend the Saturday morning's service. Quality holding up well. Timidity is slightly easier, being quoted at \$13@14; upland is stead at \$10@11, at Calgary.

FEED OATS—Good demand, but supplies are scarce. Small lots of last year's crop cleaning up.

HIDES—Market weak as tanners are not making purchases owing to having more leather on hand now than they can find market for. Receipts coming from country butchers only as farmers are not doing much butchering just now. Quality very good. Prices show no change.

FURS—Odd coyote pelts being handled, but these are practically worthless. Nothing else arriving. Cross fox, marten and mink found market in the east and in the States good, but coyote was weaker.

Everybody come.

Shower for Bride

OF THIS MONTH

Honoring Miss Inez Fenton, a bride of this month, Mrs. M. L. Wright assisted by Mrs. F. W. Higginson and Miss Sellar were hostesses at a miscellaneous shower on Wednesday afternoon of last week. About thirty intimate friends of Miss Fenton were present and she was the recipient of many beautiful and useful gifts.

A short program added greatly to the pleasure of the afternoon. Pieces of advice on "How to manage a Husband," were written by each one present and given to the bride for future reference. While Miss Vileta Wright rendered a musical selection, little Edna Schonert and Pat Wright presented the baskets of gifts.

A delightful luncheon was served by the hostesses. Assisting were Miss Norma McConnachie and Miss Vileta Wright.

HIGH SCHOOL REPORT

The following is a report of the tests given in the month of September. The first figure after a name indicates the number of tests written, the second, the number of subjects in which the student got honors, that is, 70 per cent or more; the third, the number of subjects in which the student failed, that is, obtained less than 50 per cent. A.H. indicates an average honor mark; S.S. is given only to those who are present for all tests and who obtain an average of 80 per cent or more.

Grade XI—Morris Wright A.H.; Vileta Wright (3, 0, 2).

Grade X and XI—Myrtle Glasgow (3, 0, 0); Mary Sanders (5, 3, 0); Margaret Rae A.H.; Frank Maguire (4, 1, 3); Grace Love (6, 1, 1).

Grade XI—Florence Allen (6, 0, 3); Eleanor Barber (7, 4, 0); Beulah Black (7, 3, 1); Marjorie Locke S.S.; Helen McDowell (5, 2, 0); Remmie Mathison A.H.; Ethel Milburn (7, 2, 0); Harriet Nash A.H.; Bertil Sellstedt (7, 2, 0); Violet Simmons (7, 4, 0); Phyllis Thurston S.S.

Grade IX—Eva Congdon (5, 1, 1); Mabel Enger (6, 2, 0); Vera Herbert (5, 0, 2); Elizabeth Higginson A.H.; Vera Thorpe (6, 1, 2).

WEEKLY REVIEW PROV. MARKETS

BEEF—Edmonton reports that the market there during the past week has been dull and drab. The choice heavy steers brought from \$9@9.50; choice light \$9@9.50; good from \$8.50 @ \$8.75; medium at \$8@8.25, and common \$6.50@7.50.

STOCKERS, FEEDERS—Demand in this market was fair. Feeder steers making \$7@8.75; stock steers from \$6.50@8.50; stock heifers \$5@7.25 and stock cows \$4.50@5.60.

Edmonton reports that market values there eased off around \$1.75, which brought thick smooths down to \$10 and selects \$10.50, on a fed and watered basis.

CREAM—Values dropped 2¢ during the week, thus making special grade 41¢; first, 39¢ and second 36¢ at the centralizers, with country point values 2¢, and in some instances, 3¢ lower.

POULTRY—Demand for heavy birds, but light stuff finding things rather drab. Receipts very light.

EGGS—Receipts light and storage stocks being drawn on heavily. Demand continues active, and it is difficult to fill orders. Prices 2¢ higher with some sections of the trade and unchanged with others.

HAY—Shipments from country points are light. Demand continues to show more life, although not overactive. Quality holding up well. Timothy is slightly easier, being quoted at \$13@14; upland is stead at \$10@11, at Calgary.

FEED OATS—Good demand, but supplies are scarce. Small lots of last year's crop cleaning up.

HIDES—Market weak as tanners are not making purchases owing to having more leather on hand now than they can find market for. Receipts coming from country butchers only as farmers are not doing much butchering just now. Quality very good. Prices show no change.

FURS—Odd coyote pelts being handled, but these are practically worthless. Nothing else arriving. Cross fox, marten and mink found market in the east and in the States good, but coyote was weaker.

New York Yanks are World's Champs

The New York players are sitting pretty today as the world's champion baseball players. They trounced the St. Louis Cardinals, the pick of the National League, in four straight games. The Yanks won two in New York, then rode to St. Louis and defeated the Cards in two straight on their home lot. The final game was featured by three home runs by Babe Ruth, the Yanks slugging ace. The Yanks went on a batting spree and knocked the St. Louis pitchers for five home runs in one game.

"Are you the groom?" asked the bewildered old gentleman at a very elaborate wedding. "No, sir," was the reply of the embarrassed young man, "I was eliminated in the preliminary try-outs."

Do Not Neglect Your Eyes!

If troubled with headaches, pains in the eyes, or if your eyes tire often doing any work, do not delay but see me at once.

Spectacles, Eye Glasses and Artificial Eyes, the best in the West. Repairing neatly and promptly done. Charges moderate.

ELEVATORS FILLED STATES REPORT

Threshing is fully seventy-five per cent completed throughout the province and good progress is being made with the remainder, according to telegraphic reports received by the Department of Agriculture for the fortnightly crop report of the season.

Weather conditions during the past two weeks have been generally satisfactory, although in a number of localities light falls of rain and snow have hampered operations to some extent. Grain is moving rapidly to market and at some country points elevators are reported to be filled to capacity.

Recent reports make it difficult to estimate with any degree of accuracy the damage resulting from frost. In a number of localities and in the case of earlier crops generally injury has been very slight, while in other districts the quality of a considerable percentage of the grain threshed has been lowered from one to three grades and a marked decrease in the anticipated yield is reported.

In the Peace River country the season has been very satisfactory, and grades on the average are stated to be better than for last year's crop. A great deal of fall plowing has been done throughout the province, and the along with the large amount of land newly broken during the past summer, promises an increased acreage in readiness for next season. Good progress is being made with the harvest of the sugar beet crop in the southern part of the province, and very satisfactory yields are reported.

ANNOUNCEMENT
To My Friends and
Customers:
I am moving to Hardisty for the winter but will continue to serve my customers in all parts of the district as in the past.

An Inspiring Sight

The prairies of Western Canada during this year of grace, 1928, have been a joy to behold. In the early summer following the June rains the tender verdant green of the recently sown grain crops presented a restful picture full of promise for the future. As week followed week of almost ideal growing weather, with only an occasional storm affecting restricted areas, and an absence of rust and insect pests, the early promise of a bountiful crop grew steadily into a certainty.

Inspiring as the prairies were in early spring and the first days of summer, and full of promise as they were, as the crops became taller and the heads began to develop and fall out as they swayed to the passing breeze, it is in the late summer and early fall months that the West really comes into its own and presents a picture which few places in the world can rival and none surpass.

This article is written in mid-September when days of unsurpassed sunshine prevail, each day closing with a glorious sunset, the promise of still another day of perfect harvest weather to follow. The writer has just completed a motor trip through hundreds of miles of grain fields. And what a sight! If the pessimists of our Dominion could make such a trip surely their croaking voices would be silenced.

Spreading along almost perfect roads, albeit only well graded dirt roads, whether over prairie as level as a billiard table, or with the feeling of a bird rising and dipping as the car speeds over more rolling country, dropping in to a valley here and winding up through the hills, only one sight reaches the eye, and that panorama extends unchanged as far as the eye can reach—a seemingly limitless expanse of yellow golden grain. The whole country is golden yellow.

And no great industrial city in the world can show a scene of greater activity. On all sides can be heard the click and clatter of the binders as they cut down the ripened grain and with automatic carelessness toss the bound sheaves to one side, ready for the stokers. With amazing frequency the sight is witnessed of the newer combines—reaper and thrasher—some using the swather-attachment, others threshing the grain as the big machines move onward with the irresistibility of a tank in modern warfare. In some fields the harvest hands are busy in groups gathering the sheaves into stacks; across the road a threshing gang is at work; horses hauling great racks or stock-loading machines, pitchforks, engineers, firemen, drivers, all covered with dust and working at high pressure to accomplish a maximum of work before daylight falls.

And as one speeds along the road it becomes a necessity to slow down and turn out every few minutes as we pass, or allow to pass, a box wagon or motor truck loaded to capacity with the wheat being hurried to the elevators, those far from artistic but essentially modern and practical adjuncts to twentieth century grain raising and marketing. Every road is alive with them, great wagons drawn by teams, double teams, horses three abreast, countless new motor trucks, strings of wagons hauled by a tractor, driven by old men and young boys, boys heavily in their teens, women and girls, all headed to the nearest railway station.

And these small prairie towns and villages through which we pass every eight or ten miles all present the same scene of tireless activity. The loaded grain wagons and trucks are lined up awaiting their turn to reach the elevators, while the "putt, putt" of the engines testify to the energy with which the elevator operator is striving to keep up with the golden stream pouring in upon him. At the same time is heard the "hiss" of the grain as it is cupped through the elevator chutes into the waiting freight cars. All night long the elevators struggle with the gigantic task before them and through the night the long trains plough through the darkness hurrying the proceeds of the farmers' toil to the hungry markets of the world.

And where are those tens of thousands of harvesters from Eastern Canada, British Columbia, and the miner-harvesters from over the sea, which a few days ago thronged our cities and larger town distributing centres? Scattered singly or in groups they have been swallowed up in the grain fields of Canada's prairie provinces. They have been merged into and become a part of the Epic of the West. They are working hard, but they are, too, catching a glimpse of a new life and it is inconceivable that they will fail to become imbued with some of the courage, the optimism, the vision of this great new land.

September days in Western Canada! Glorious days, health-giving, wealth-giving.

A New Wireless Wonder

Apparatus Supplies Heat Without
Apparent Direct Contact

The latest performance in which wireless is employed, consist of supplying heat to bodies without establishing apparent direct contact between the heater and the heated body, and lighting lamps without any apparent electrical supply.

These are done by power obtained from a new short-wave vacuum tube. High frequencies are produced at high power, using a short-wave length.

Foodstuffs have been enclosed in a glass tube and hung from the end of a metallic "aerial" that receives the transmitted power and conveys it to the food in the form of heat and cooks it.

New methods in electrical treatment are always being looked for by doctors. Perhaps, in the future, this new apparatus will be used for imparting heat to the body to produce

artificial "fever," one of Nature's most prevalent factors in recovery from many diseases.

A Corrector Of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Eclectic Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

New Use For Radio Waves

Will Kill Germs Found In Milk, Says
Austrian Professor

Radio waves will kill germs found in milk, according to a report received by the medical college of the University of California, from Dr. Karl Seidel of the University of Vienna.

Research done by the Austrian professor indicated that intense radio beams of very short wave length will kill germs without altering the milk molecules nor changing the natural flavor, the report says.

A graceful compliment comes from Paris. A very pretty girl was standing in front of a French wit at the races. "I trust I am not obscuring your view," she said. "Madame," he replied, "I prefer the obstruction to the view."

American—"Now you have no one in this country approaching Rockefeller, Frinastance."
Englishman (hopefully)—"Do you think it would be any use?"

Wonders Of The Unknown

Wireless Has Revealed Many Things
But Much Remains To Be
Learned

Sounds, so faint that no human ear can detect them, but which run into the waters of an aquarium, will stun and kill small fish. An earthworm can well feel the soil the tread of a thrush above, and so keep out of harm's way. One may see a slug in a pansy bed but can you hear it munching away as it makes a meal?

There is many a quiver in the air that means nothing to human beings but has a message for the insect or the bird. Since the beginning of time, electrons have rushed through the ether at the speed of 186,000 miles per second, but we never knew of their existence until ten years ago, when "wireless" revealed it. What more remains in a world unknown to human senses?

HAD NO APPETITE WEAK AND DIZZY

This New Brunswick Woman
Restored By Dr. Williams' Pink Pills

Mrs. James Pelly, Brown's Flat, N.B., says: "I am writing to tell you the great good I had through the timely use of Dr. Williams' Pink Pills. My health had failed and I was troubled with great weakness. I had no appetite and frequently had dizzy spells. The least exertion would make me feel palpitate violently and I felt tired at all times. I had doctored a great deal without getting much relief, and was feeling greatly discouraged when I finally decided to try Dr. Williams' Pink Pills. The happy results following the use of this medicine can best be summed up by saying that I am again perfectly well, able to do my housework and enjoy life once more. I feel it a duty to recommend Dr. Williams' Pink Pills to all weak people."

If you have any, or all, of the symptoms above noted, do not delay, begin treatment at once with Dr. Williams' Pink Pills. You will be surprised to note the improvement in your condition after a few weeks. You can get these pills through any druggist or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont. If you will send your name and address a little booklet, "Building Up the Blood," will be sent free.

Intelligent Congressman

Shipowner: We must have government aid. Congress does not realize how expensive it is to operate a ship. Why, barnacles alone cost American ships \$100,000,000 a year.

Congressman: You ought to cut that item down. Use a cheaper grade of barnacles, or get along with fewer of them.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a feverish restlessness, frequently ending in convulsions. A point of vital importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Turks Are Progressing

Dictator: Kemal Pasha is compelling the Turks to abandon the Arabic alphabet and to learn the Latin alphabet. Turkey is more progressive than the Irish Free State with its compulsory Gaelic. What the Turk goes forward the Celt goes back.

Minard's Liniment cleanses cuts, etc.

"Not by appointment do we meet delight and joy; they heed not our expectancy; But round some corner in the streets of life they on a sudden clasp us with a smile."

Joseph Conrad, the novelist, could not speak English until he was 19.

Pimples Itched And Burned Badly Cuticura Healed

"Pimples broke out on my nose and spread all over my face and body. They were hard, large and red, and itched and stung so that the pimples itched and burned so badly that I scratched and scratched, causing many eruptions. I was so painful that I could not sleep, and used to cry from the pain. The trouble lasted two years. I purchased some Cuticura Soap and Ointment and after using them two days I found they were helping me. I continued the treatment and after using four cakes of Cuticura Soap and three boxes of Cuticura Ointment I was healed." (Signed) Miss Lucy Kinakin, Vergin, Sask.

Make Cuticura Soap and Ointment your every-day toilet preparations. They will give you a clear, soft, smooth skin, and a healthy scalp with good hair. Cuticura Talcum is unexcelled in purity.

Sample Each Free by Mail. Address: Canadian Cuticura Sales Co., 1111 Broadway, New York, N.Y. 10036. Cuticura Soap 25¢. Cuticura Talcum 25¢. Cuticura Shaving Stick 25¢.

Recipes For This Week

(By Betty Barclay)

DELICIOUS VEAL

Use veal steak one-half inch thick. Cut into pieces large enough for a serving. Beat the yolk of one egg and add a teaspoon or more of water, into this dip the veal; then roll in bread crumbs which have been tossed and well seasoned with salt and pepper. Have an iron spider piping hot with about one-fourth inch of fat in the bottom. Pan-fry the veal quickly on both sides until a nice brown, then cover the veal with hot milk (a pint or more of sour cream may also be used). Cover tightly and set in a slow oven for about one hour, removing the lid for the last fifteen minutes.

FAIRY FLUFF

4 egg yolks.
4 tablespoons sugar.
1 cup orange juice.
Grated rind 1 orange.
Grated rind 1 lemon.
2 tablespoons hot water.
4 egg whites.
2 tablespoons sugar.
Lady-fingers.

Beat egg yolk with four tablespoons sugar; add orange juice and grated rind, lemon juice and grated rind, and hot water, and cook in double boiler until mixture thickens, stirring constantly. Beat egg whites until stiff, add two tablespoons sugar, and fold into first mixture. Cut into sherbert glasses with lady-fingers; fill with orange mixture and serve.

Milk May Be Sold In Sheets

Danish Farmer Has Invented Wonderful New Machine

The world is said to several varieties of prepared milk and to milk powder, but shortly it will be made, and sold, in sheets.

A landed proprietor at Copenhagen has invented a device which extracts the water from fresh milk and leaves dry milk which comes from the machine in a form resembling sheets of rather heavy tissue paper. In this form the milk, it is stated, can be kept for years, and becomes "fresh milk" again by mixing it with lukewarm water.

It is intended to build a factory to make this "sheet milk," which should be important to agriculture.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Eclectic Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

Locating Rome

An American mother and daughter had made an exhaustive tour of the Continent. When they returned to their "home town" somebody asked the mother if they had been to Rome.

"Say, Sadie," said the mother to the daughter, "did we go to Rome?" "Why, mother," replied the daughter, "of course we did. Don't you remember that's where you bought the black silk stockings with the white circles?"

Teacher: "Johnny, why is it that you are not as polite and well behaved as Jimmy?"

Johnny: "Well, he lives in a street where all the other boys are bigger than he is."

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

The hardest part about knowing some people is to conceal your opinion of them.

Minard's Liniment for Every Pain.

Some Good Bargains

Land Bought For Almost Nothing Is Now Invaluable

Probably the world's best bargain was made by Peter Minuit, a Dutchman, who bought the whole of Manhattan Island from the Indians in 1624 for goods worth \$24. Almost as good was that of Simon Van Der Stelt, one time governor of Cape Town, who bought the bay of Port Natal for \$50 worth of goods.

The East India Company made a gigantic bargain in the year 1668. Charles II. had just been given the island of Bombay as a dowry at his marriage with Infanta Catherine, of Portugal. The King thought the place worthless—as the Portuguese had done—and allowed the Company to rent it for £10 a year. In 1641 an agent of Lord Stirling's sold the whole of Nantucket Island to Thomas Mayhew for £10; eighteen years later Mayhew sold a joint interest to nine partners for £30, and two heavier hats! The island is now a separate county of Massachusetts.

A worth-while sale was effected by Roger Ludlow, a year before Mayhew bought Nantucket. Ludlow gave the Indians six fathoms of wampum, 6 coats, 10 hatchets, 10 hoes, 10 knives, 10 pairs of scissors, 10 jew's harps, 10 fathoms of tobacco, 3 ketles, and about 10 looking glasses for all the land between the Norwalk and the Saugatuck rivers in Connecticut, extending one day's walk from the Sound.

Explanation Is Simple

Exceedingly strange are the ways and wherefores of names. Take, for instance, the letter "Q"—how many of us have ever stopped to think or to ask ourselves why we call it "Q"? And the answer is just as strangely curious as the question. The name of the letter "Q" is from the French word "queue" meaning "tail." "Q" is simply an "O" with a tail!

Millions Still In Slavery

Slavery is still practised in nineteen countries of the world. The number of slaves is estimated at least 4,000,000. These men, women and children can be taken and sold for profit like any article of commerce. There are still nearly 2,000,000 slaves in Abyssinia out of a population of 10,000,000.

MOST people know this absolute antidote for pain, but are you careful to say, Bayer when you buy it? And do you always give a glance to see Bayer on the box—and the word genuine printed in red? It isn't the genuine Aspirin without it! A drug-store always has Bayer, with the proven directions tucked in every box!

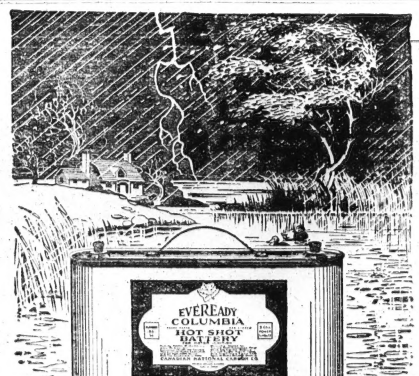

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer made tablets, to assure the public against imitations, the tablets will be stamped with their "Bayer Cross" trade mark.

Ex-Kaiser Recovers Farms

Former Kaiser Wilhelm of Germany, has won a suit for the recovery of two confiscated farms. The farms were seized by the Government of the Union of South Africa, in 1920. The case is considered important as setting a possible precedent for actions to recover the former imperial estate in other countries, notably in Poland.

Worms in children, if they be not attended to, cause convulsions and often death. Mother Graves' Worm Expeller will protect the children from these distressing afflictions.

There are 42,992 women employed underground in the mines of Japan at present, and new regulations provide that no more shall be so employed.

Weatherproof

Dry batteries last longest when protected from wet or damp. Eveready Hot-Shots give you full value for your money, because they are housed in metal cases.

Before you buy a battery for ignition in exposed places, make sure it bears the name "Eveready Hot-Shot." Other batteries may resemble these famous power plants in appearance, but only Eveready can make the genuine Hot-Shot.

The Eveready Ignitor shown on the left is the longest lived single dry cell money can buy. It is for use indoors or under cover.

Scientists Eagerly Awaiting The Near Approach of Mars In Hope of Solving its Secrets

Mars is again approaching the earth, and man, who is ever on the Martian track, is getting excited over the prospect of at last winning from the ruddy planet one of its most profound secrets—the existence of intelligent beings.

Two years ago, when Mars was in a very favorable position, changes were noticed compared with the observations of 1924. The large area of vegetation known as the "Lake of the Sun" had completely altered its shape and shifted several hundred miles northwards. The "canals" had also changed their configuration.

Was it due to Martian agriculture on a colossal scale or was it the result of a catastrophe of nature? asks the Daily News. The extraordinary fact remains, however, that the "canals" as seen in 1926 had reverted to their appearance in drawings made half a century ago.

In December, when the planet will be at its nearest again, scientists hope to solve many riddles and to gain some clue whether rational intelligence lies behind the movements of "The Lake of the Sun" and the "canals."

Dr. R. L. Waterfield, the News' astronomical correspondent, writes that the approach of 1926 was probably the most remarkable since those of the late 'seventies and early 'eighties, when Schiaparelli made his discoveries of the Martian "canals." For two years ago things happened on Mars that had never happened before. Certain prominent features of the planet's surface had undergone an entire transformation since the previous apparition. Of these the most remarkable was the case of that large, dark oval marking, the so-called "Lake of the Sun."

This is a large area of vegetation covering several hundred thousand square miles; not only had it completely altered its shape since 1924, but it had been shifted bodily northwards several hundred miles, a distance greater than its own diameter. Moreover the system of "canals" leading in and out of it had taken on quite a new configuration.

"Such a phenomenon is entirely unexplained," says Dr. Waterfield. "Was it an earthquake or some stupendous hurricane or tempest that wrought the change? For one has to remember that there are no large oceans on the planet in which or out of which countries can sink or rise. One tentative suggestion was that this was yet another manifestation of the existence of intelligent beings; that we might have been witnessing the fallowing of land upon a vast scale."

"But there were other remarkable changes on the planet; thus in the region of the 'Greater Syrtis' the configuration of the 'canals' and the dark markings had reverted to the form which they exhibited in the drawing of Schiaparelli half a century ago."

"And this is why this coming of the planet is going to be so exciting. Will the Lake of the Sun have moved back to its position previous to 1926, will it have remained the same, or will the changes have progressed further in the same direction?"

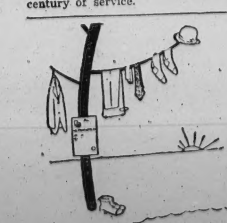

"Moreover, are we going to find changes of the same nature in other parts of the surface? Finally, will the study of these so far inexplicable manifestations shed any new light on the riddle of the canals, or, in fact, of the whole of this mysterious little world?"

Maid: "The furniture man is here."

Mistress: "I'll see him in a minute. Tell him to take a chair."

Maid: "I did, but he said he would start with the piano and radio!"

The Holyhead lifeboat station, the only one on the British coast with a steam lifeboat, has just completed a century of service.

The tidy suicide—Die Musketeer, Vienna.

Supplies World's Markets

Rose Gardens In Bulgaria Furnish Precious Attar

Bulgaria's far famed Valley of Roses has once more captured the world's markets for precious attar.

As far as the eye can see a red carpet covers this enchanting region, and the peasants smile because they see the end of a long period of depression. Eighty-five per cent. of the world's supply of rose essence, the base of all perfumes, is produced in this district, which stretches for ninety miles through one of the most picturesque regions in Europe.

The delicate rose vines suffered severe damage in recent earthquake, but this has been overcome, and the crop this year will be only 30 per cent. under normal. There are 33,000 rose gardens in Bulgaria. A hundred thousand Bulgarians, about 14,000 families have no other means of livelihood.

The rosebuds are shipped to 266 distilleries. More than 4,000 pounds of buds are required to yield one pound of attar, which sells in the United States for \$250.

The peasants are still depressed by one factor. They believe that the American girl is using less scent than ever before. The latest figures for the export of attar of roses to the United States barely reach 10,000 ounces for a year, compared with an average annual demand of 100,000 ounces before the war.

Unmistakable Chic

A sheer yellow-beige crepe, developed along Princess lines, affects a diagonal closing bodice, draped so as to give slender hips, terminating in huge soft bow with long ends dangle below hemline. The bouffant of triple tiered skirt are placed so as to give impression of length. Style No. 270 is becoming to the slender miss or dignified matron, inclined to plumpness. It is extremely fashionable in black lustrous crepe satin, black crepe Elizabeth, green canton-tulle crepe, wine red or navy blue wool crepe. Pattern for this exclusive dress is designed in sizes 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches bust. Price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Must Work On Farms

British Harvesters Unable To Find Winter Work Must Return Home

A letter written by W. J. Egan, deputy minister of labor, in response to a query sent him by Tom Moore, president of the Dominion Trades and Labor Congress, and which contained a statement respecting the movement and disposition of British winter harvesters, was read at the congress sessions in Toronto. Mr. Moore, who read the letter, explained that he had seen published reports that jobs were to be found for the British miners in the cities following the expiration of the harvesting season.

"I want you to thoroughly digest this statement," Mr. Moore said after he had read the letter, "in effect they are that immigrants for the harvest must work on the farms during the winter or return to their homes."

Mr. Egan's letter read: "In reply to your inquiry I beg to state that the original inquiry with regard to the harvest movement from the British Isles, came from the British government and finally after consultation with the governments of Manitoba, Saskatchewan and Alberta it was decided to proceed with the movement, the responsibility for the same to rest with the British government and the two Canadian Railways, with the railways being responsible for the securing of work during the harvest and winter farm employment, the provincial governments, and this department to co-operate in finding the last mentioned and adequate provision being made for the return of men who cannot find employment."

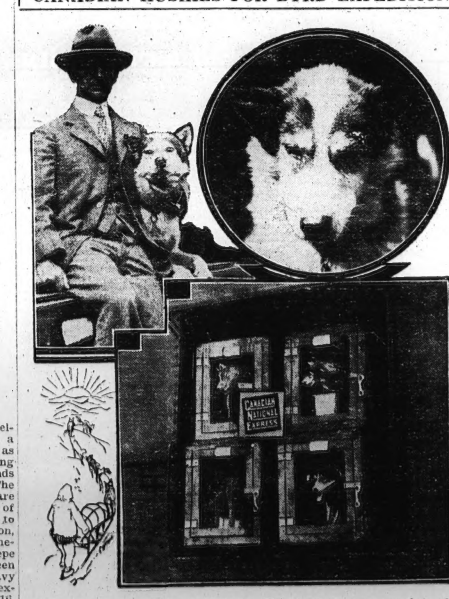

Field Hockey Ancient Game

Tablet Recently Found In Athens, Represent Youths At Play

Everyday discoveries are being made with regard to ancient people. When some workmen were clearing out the rubbish from one of the walls of the Acropolis in Athens, for which, by the way, Themistocles used anything that came handy, they came across two marble tablets sculptured in relief. And one of these tablets represented two youths holding hockey sticks in their hands, ready to hit the ball, which lies between them, whilst a third is in the act of giving the signal to begin.

A scientist predicts that in a few years people working indoors will work under lamps whose rays will be as beneficial as the sun's.

CANADIAN HUSKIES FOR BYRD EXPEDITION

When Commander Richard Evelyn Byrd desired dogs for the use of the South Polar Expedition he, naturally, thought of Canada and it was to the north shore of the St. Lawrence by Quebec and Labrador he sent his agents to select and purchase huskies.

David E. Buckingham, V.M.D., consulting veterinarian to the Byrd Antarctic Expedition, went along the north shore and inspected the purchases which were assembled at Harrington, Mutton Bay and Blanc Sablon. The latter place, just inside the Quebec boundary, had a previous flash of fame as the community from which part of the news of the landing of the trans-Atlantic plane, Brenner on Greenly Island, was flashed to the world at large.

The dogs were conveyed to Quebec by the S.S. North Shore, of the Clarke Steamship Company, and at Quebec transferred to the care of the Canadian National Express.

Two special cars were in readiness and the dogs, each in a private stout crate, were carefully placed on board and dispatched to Montreal by the day express. At Montreal, the cars were switched to "The Washingtonian," and on this crack train of the National System the huskies were sent to Washington en route to the United States Naval Supply Base at Hampton Roads, Virginia. From that point the Canadian dogs will sail for New Zealand, Ross Sea and Bay of Whales. There were 79 dogs in the shipment handled by the Canadian National Railways.

Caring For House Plants

Coffee Grounds and Olive Oil Are Two Simple Remedies

Some people have great difficulty in growing house plants, while others seem to be able to grow almost any kind of plant in any home they occupy.

Gas, insect sprays, too little water, too much water, too little sun and too much sun—any or several of these may be responsible.

However, there are several simple plant medicines that may revive sickly house plants. Coffee grounds on the roots three or four times a week will often work wonders, particularly if two teaspoonfuls of olive oil are added each ten days or so.

Check the plants for gas, insect sprays, lack of water and such things, and if they are still sickly, try the coffee grounds and oil cure.

Issues Stamp Journal

Missouri's newest and most unique organ, The Stamp Journal, has made its first appearance. The editor of the journal is William Howard Taft, 12-year-old student and distant cousin of Chief Justice W. H. Taft. With miniature pages 4 by 6 inches, the first issue was a six-page publication, containing stamp news, editorials and advertisements.

The Mechanical Man Now Applied as a Safety Device For Protection of Railway Trains

The September Dip

Sheep Should Be Dipped Both In the Spring and Fall

The spring dipping of sheep is not sufficient for the whole year. To keep the flock free from external parasites sheep should be dipped in the spring and again in the fall. A warm sunny day in September is a good time. A properly arranged dipping tank is a necessity on any farm where sheep are raised. When the sheep arrive home from the fairs and exhibitions or when fresh stock is introduced dipping should be practiced.

Ticks, lice, and scale spread rapidly and the best protection is dipping. A satisfactory tank for the operation is fully described in Bulletin No. 75. New series, which may be had on application to the Publications Branch, Department of Agriculture, Ottawa. This bulletin of 111 pages deals very fully with "The Sheep Industry in Canada." It contains an historical review of the industry, and chapters on the leading breeds, the establishing of a commercial flock, fattening, handling, feeding, diseases, and many other angles of this important industry.

Carniolan and Italian Bees

Report Of Tests Contains Information Of Value To Bee Keepers

Comparative tests have been conducted by the Bee Division of the Experimental Farm, Ottawa, to determine the relative value of Carniolan and Italian bees. The Italian bees gave the following average crops: 1924, 191 lbs. 5 ozs.; 1925, 225 lbs.; 1926, 104 lbs. 4 ozs.; 1927, 181 lbs. 14 ozs. The Carniolans gave: 1924, 87 lbs.; 1925, 206 lbs. 5 ozs.; 1926, 73 lbs. 2 ozs.; and 1927, 119 lbs. 14 ozs. The Carniolan bees showed themselves to be more persistent in their preparation to swarm than the Italians. These results have been taken from the Annual Report of the Dominion Apiarist of the Experimental Farm. The report contains a great deal of information of value to beekeepers. It covers a wide field including experiments on pollination by bees, queen breeding, wintering, diseases, etc. Those interested may obtain copies on application to the Publications Branch, Department of Agriculture, Ottawa.

May Be Right Solution

Idea Is That Calgary Was Compromised For Indian Names

Why Calgary was called Calgary is a problem that seems to worry a good number of people every two years or so, and just lately the discussion has broken out again in the Vancouver Province. Officially the fact seems to be that the bustling Alberta city was so named by Colonel MacLeod, of the Mounted Police, after a place name in Skye from which the colonel had come.

Further information newly brought to light, however, suggests a new solution. The Indian names for the junction of the Bow and Elbow rivers on which the city stands were Mokk-inist-in-aka-apeewis (Blackfoot), and O-toos-kwa-nik (Cree).

Obviously a place carrying the burden of two such names had to be called something else and Calgary seems a distinct improvement over the efforts of the aborigines.

Times Have Changed

An old-time country store-keeper notes a marked decline in the demand for goods that were once considered staples. He complains that "Ten years ago we carried gloves by the gross, straw hats by the hundred, and overalls piled to our chins to outfit the army that came to work in harvest. In this day of machinery there's mighty few men to supply with such stuff, and the only red handkerchief I sold this season was nailed on the end of a truck for a danger flag."

Blind But Sails Yacht

A blind yachtsman sails his own vessel at Cowes. He is Mr. Gerald Lowry, a London osteopath, who lost his sight during the War. Although in races he is not allowed to take the tiller, he acts as one of the crew and is just as capable as any of the others. When pleasure cruising he steers largely by sense. The balance of the boat helps him a lot, as does the feel of the wind. His hearing indicates to him the set of the sails.

First Tramp (surveying stream of motorists): "I ate 'olids. Make ye feel common when nobody ain't workin'."

The mechanical man answers the telephone, throws switches, talks, opens doors, and does hundreds of other things these days, but perhaps its most novel achievement is running a railroad train. Now "Old Man Reliable" is riding, perched right above the cowcatcher, on the front of engines of the New York, New Haven & Hartford Railroad. His eyesight is good day and night.

He is on the job every minute. Should the engineer fail, he is on the job to warn him instantly and to act within five seconds, in an emergency, to stop the train. He is foolproof, according to the engineers, and eliminates the frailty of mistakes so common to man.

"Old Man Reliable" is the name the railroad workers have given the automaton. "A Ton of Safety" is another of their names for the device, for a ton is the approximate weight of the equipment necessary to fit a locomotive for train control. Train control is the way the railroad officials speak of the apparatus, which is similar to a radio set and is housed in a box on the front end of the engine.

The device relays light signals of the right-of-way to the engine cab, and the engineer is required to acknowledge a change in signals within five seconds. If he fails to comply within that period the automatic device applies the brakes. They can not be released until the train has come to a stop and the engineer has descended to the ground and manipulated what is known as a "penalty reset device" underneath the cab. He may then climb back in the cab and release the brakes.

The use of this safety apparatus has also necessitated adopting another color in railroading. Green for train is clear; red for stop, and yellow for proceed cautiously, have been stand-by colors for years. Now "lunar light," a white light resembling in color the light given by the moon, has been adopted for the safety device to warn the engineer that unless he acts the brakes will be applied within five seconds.

Farm Products Are Worth \$2,000,000,000

Expect Largest Return Ever Received From Our Basic Industry

With the official announcement of a record wheat crop this year in Canada, estimated at 550,482,000 bushels, there is a Dominion-wide feeling that the general outlook for business in all lines is very encouraging. Farmers everywhere, particularly in Western Canada, have reason for optimism. Generally speaking, agriculture in Canada is in a prosperous condition. This year grain and other field crops will, it is estimated, have a total value of fully two billion dollars, the largest return ever received from Canada's basic industry.

Price Came High

The American actress, Miss Vivienne Osborne, is responsible for this story.

It concerns a clergyman in one of the southern states who married a colored couple.

"How much Ah owes you, parson?" the bridegroom asked at the end of the ceremony.

"Oh," said the minister, "pay me whatever it's worth to you."

The young fellow looked his bride over from head to foot with adoring eyes. Then he turned to the clergyman.

"You've ruined me for life, parson," he said "You sush has!"

O'Brien—So the landlord lowered the rent for ye He'll save money at that."

Casey—"How's so?"

O'Brien—"Sure it's less he'll be losin' when ye don't pay it."

"We are foster brothers. We grew up together—shoulder to shoulder!—Moustique, Charleroi."

LOCAL EVENTS IN OTHER TOWNS

An unidentified man tackled M. A. Haynes, of the local government liquor store Tuesday afternoon, and knocking him down, made away with an imperial quart of Hudson Bay whiskey. Mr. Haynes was stunned with the blow and unable to pursue the robber who made good his escape. Bassano Mail.

Up to recent years, almost any handy man could install their own electrical wiring, etc., but to-day, we have High Power, High Voltage, death-dealing energy. This is a deadly menace to the inexperienced electrician. It is a silent, invisible force, which will quickly cause death and destruction. One careless slip will be the last. We are informed, this matter will probably be taken up at the next session of the Provincial Legislature. —Castor Advance.

Between six and seven on Saturday evening last, fire was discovered by Mike Steve in the warehouse of the Tofield Farmers' Supply Co. The blaze spread so rapidly that nothing could be done to save the building already well alight. The main building which was only a few feet from the fire was in danger so a number of volunteers formed a bucket brigade and kept the south end well drenched with water while others climbed upon the roof and kept the room thoroughly wet.—Tofield Mercury.

On Monday last, in response to a telephone call, four cars, loaded with fire fighters, and driven by Messrs. Swain, McLachlan, Cundall and Nelson McLaughlin drove out to Mr. Ackroyd's, four miles north of town, where a prairie fire had started on Section 17, across the road east of Mr. Ackroyd's farm. Along with Mr. Ackroyd, Alex. Ross, Billy McAuley and other near-by farmers they succeeded in putting out the fire with wet sacks before any considerable damage was done, other than burning up the grass on a hundred acres or so. —Mannville News.

In a fire which started in a packing case filled with excelsior in the basement of the Stanley Hotel on Jasper avenue, Edmonton, Steve Glubish, aged 28, his wife, Nancy, aged 24, and their little daughter, Dora, aged 4, lost their lives on Wednesday afternoon. Steve Glubish, who lost his life, was a son of Mrs. Mike Glubish, of Leduc district, which brings the tragedy home to many in the community.

The Stanley hotel in which the fire occurred is one of the city's landmarks and was known in the old days as the Pendennis hotel.—Leduc Representative.

Two Mundare boys, Harold Stevenson and Albert Lesnik, had a close call on Sunday evening about six o'clock, when the new Ford sedan driven by Stevenson turned several somersaults and wound up as a complete wreck. The accident occurred on the highway a few miles west of town.

The boys were driving at top speed and it is surmised that the sudden application of the brakes caused the car to swerve and turn end over end. The boys were shot from the car seat through the top and right over the ditch, sustaining some injuries which will keep them thinking for a while but which are not serious.—Vergville Observer.

Sub-Inspector Keith Duncan, officer commanding "B" division, Alberta Provincial Police, Red Deer, has been promoted to the rank of Inspector.

Inspector Duncan has had 22 years experience in police work, twelve in the old R.N.W.M.P., and ten in the A.P.P. He has established the reputation of being "hundred per cent policeman." He took hold of the Blainmore and Crown's Nest Pass district at a time when it was a riot of moon-shining and bootlegging, and cleaned it up during the four years he was there. It was Sergeant Duncan, as he then was, who located the absconding treasurer of the Blainmore Municipality, traced him to London, England, and brought him back to Alberta to stand his trial. —Red Deer Advocate.

NORTH VANCOUVER BOY

INJURED BY AUTO
Dartling after a ball in front of an auto driven by George W. Gilmour, James Dayton, six year old son of Mr. and Mrs. James E. Dayton, 231 Twenty-Ninth Street east, was knocked down and sustained severe bruises on his body and cuts on his head, Thursday afternoon.

The accident occurred at the intersection of Londale avenue and Twenty-fifth street.

His condition is not serious.

VANISHING FAMILY LIFE

The tendency of the child of today to be independent of the family has led to many a discussion in the pulpit; the public press and on the platform on the disappearance of what was once known as "family life."

James E. West, Chief Scout Executive of the Boy Scouts of America, has recently given editorial utterance on this subject, and his opinion and advice are of considerable interest. He says:

"To preserve the unity of the family there is nothing to compare with the comradeship developed through collective family activity; those get-togethers, picnics, hikes, drives, in which the entire family takes part. They ought to be on the program of every family. They give a sense of oneness which nothing else can."

"A sense of unity is also strengthened when the entire family shares the interest of one of its members. If the son collects stamps it does make a difference whether the whole family responds enthusiastically to the 'find' of a Ceylon One Penny; or what attitude they take to his athletic or scholastic successes. When the daughter of the family wins in the finals of the tennis tournament it adds to her triumph if the whole family rejoices."

"The third great means of creating family unity is family co-operation. By this I do not mean merely helpfulness one to the other, but rather the family enterprises, the home tasks into which the labor of each dovetails into the finished job. To play, to adventure together is good, but the cement of a family solidarity is to work together to a common end."

Rupture Expert Here.

F. H. Seeley, of Chicago and Philadelphia, nationally famous expert,
himself (personally) be at the Mac-
Donald Hotel and will remain in Ed-
monton this Wednesday, Thursday and
Friday only, October 17, 18, and 19th,
from 9 a.m. to 5 p.m. daily.

Mr. Seeley says:

"The Spermatic Shield will not only
retain any case of rupture perfectly,
but contracts the opening in 10 days
on the average case. Being a vast ad-
vancement over all former methods—
exemplifying instantaneous effects im-
mediately appreciable and withstand-
ing any strain or position no matter
the size or location. Large or diffi-
cult cases, or incisional ruptures (fol-
lowing operations) specially solicited.
This instrument received the only
award in England and in Spain, pro-
ducing results without surgery, injec-
tions, medical treatments or prescrip-
tions, with distinguished personal pat-
rons of all nations." "His method has
always been most satisfactory."—Late
Dr. Edward Shippen, former Medical
Director, U. S. Navy.

This instrument is the same as sup-
plied to Surg. Genls. Bureau, U. S.
Naval Hospital—Penn. R. R., Etc.
Etc.

He will be glad to demonstrate with-
out charge or fit them if desired.
Business demands prevents stopping
at any other place in this section.

N. B.—Every statement in this
notice has been duly verified before the
Federal and State Courts.—F. H. SEE-
LEY.

CAUTION—All cases should be cau-
tioned against the use of any elastic
or web truss with understraps, as
same rests where the lump is and not
where the opening is, often resulting
in strangulation.—Home Office, 117

WORLD HAPPENINGS BRIEFLY TOLD

Thomas Loudon, one-time Canadian sculling champion, died recently in Toronto, at the age of 87.

The first windmill plane has crossed the English Channel, piloted by its inventor, J. De La Cleva.

A Chinese laundry man and the employees of a millinery shop at Mexico City, divided the first prize of \$100,000, in the September 14th lottery. They held number 1246 which was winner.

Permanent government flying posts in Hudson Strait are a strong possibility. It was stated by Squadron Leader T. A. Lawrence, who with eight others, has returned from 16 months' service in the North.

Members of the provincial government and Lord Lovat, under secretary of state for the Dominions in the British Government, discussed the placing of British settlers on the land in British Columbia. The government offered the fullest co-operation.

French Canadians, resident of New England, may decide the presidential election. Ordinarily these states are Republican but it is thought Democrats will get the majority of the French-Canadian vote which is considerable.

Fire losses in Canada during the week ended September 12, 1928, are estimated by The Montreal Times at \$725,200, as compared with \$229,000 for the previous week, and with \$292,650 for the corresponding week of last year.

Establishment of the largest paper mill in British Columbia is virtually assured, according to a recent report in the Vancouver Star. The lands department, in an interview stated that the Fraser Pulp and Paper Company is preparing to go ahead with the erection of a plant in Prince George.

The committee appointed by the government of Persia to examine the Kellogg pact for the renunciation of war has recommended that Persia adhere to the pact, but should not adhere to the conditions and reservations of "certain European governments."

Many File On Homesteads

Rush Is Seen At Dominion Land Office At Edmonton

All previous records since pre-war days were exceeded during the week of August 9th to 15th, in the number of homesteads filed on at the Edmonton Dominion Land Office. The total for the above period this year was 114, while for the same period of last year only 35 such entries were taken up. Local officials attribute the increase to several causes; the general improvement in conditions, the new regulations which permit a party who has previously proved up a homestead to refile on Crown land, and to the large number of settlers now realizing the opportunity to obtain land closer to transportation and social activities than formerly.

About two-thirds of all the employees in the telephone business in the United States and Canada are women and girls.

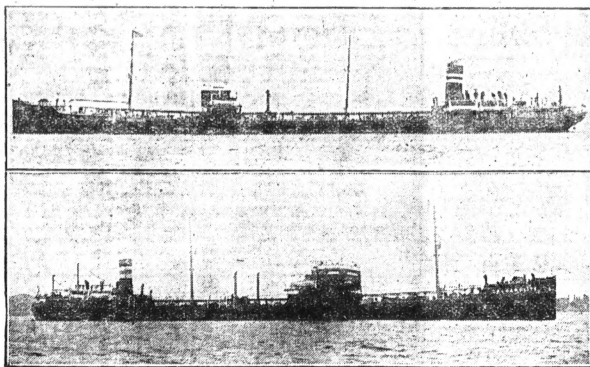

It is said man can now fly five times as fast as a bird. Maybe so, but you hardly ever hear of a bird coming down out of control.

One medical authority says that the growth of children takes place entirely when they are asleep.

W. N. U. 1752

LARGEST AND FINEST OIL TANKERS SAIL UNDER CANADIAN ENSIGN

ABOVE—The "C. O. Sullivan" world's largest tanker. BELOW—The "Calgarolite" most modern of tank ships.

With the launching in England on September 11th of the motor tank ship "Calgarolite" Canadian interests which already own and operate the world's largest tank ship, claim also the most modern and efficient of tankers, and a Canadian tanker fleet will further enhance as one of the major oil fleets of the world.

The "Calgarolite" slipped from the ways at Haverhill Hill-on-Tees with Miss Eleanor Ross, daughter of Victor Ross, Vice-President of Imperial Oil Limited, acting as sponsor. The "Calgarolite" is a 15,600-ton vessel with an indicated horsepower of 6,500, which makes her one of the most powerful and fastest tankers of her size. She is guaranteed a service speed of 12 knots. She is 540 feet long with a 70-foot beam and moulded depth of 37 feet 9 inches. Her modern equipment will permit loading and unloading of 120,000 barrels of oil in twenty-four hours, and so she will be almost continuously in transit, serving such as an "oil ferry" between Talara in Peru, Cartagena in Colombia, and Montreal and Halifax. She will establish new figures for economical transport of petroleum.

The "Calgarolite" is the last of three large modern sea-going tankers and one like tanker which were laid down some time ago in British shipyards for Imperial Oil. Preceding her launching were the "Windolite" for lake service and the "Victrolite" and "Vancolite." The flagship of the fleet in which she will serve is the world's largest tanker, the "C. O. Sullivan."

Livestock Industry Prosperous

Good Prices Now Being Obtained In Western Canada

A cycle of prosperous years faces the livestock industry of Western Canada, in the opinion of ranchers. Cattle are fetching almost double what they were turned off for three years ago and hogs are going higher. Lambs and mutton are also selling at a worth-while price and good, heavy, well-broken horses are in active demand. A survey of the agricultural situation in the United States indicates a marked shortage of beef cattle making for strength in the Chicago market, so much so that Canadian producers find it profitable to ship there despite the duty of two cents per pound imposed on fat cattle. Stocker and feeder cattle from the Canadian prairies are also wanted in the middle west.

The Follow Up Method

A new sign for motorists has appeared on an English road. It is hoped that it will be particularly effective in checking those motorists who are not too careful when on stretches of road under repair. A first notice gives the warning, the conventional "Slow Down, Road Under Repair." About 50 yards farther along is a large white signboard with the admonition: "You Have Been Warned," painted on it in large red letters.

Dedicate Canadian Airport

The Canadian Gateway Airport at Derby Line, Vermont, was dedicated recently with Vermont and Canadian officials in attendance. The dedication address was delivered by Congressman Ernest W. Gibson. Fifteen airplanes from various Canadian and American cities took part in the exercises.

The happiest people are those who are so busy they don't have time to think about whether they are or not.

Banana cloth is being used now. It should make a nice little thing to slip on when you're in a hurry.

O. Stillman. The three sea-going ships just built in the British yards replace three Imperial vessels which went to the bottom at the hands of the enemy while transporting petroleum for the allied cause. They were the "Luz Blanc," the "Retlaw" and the "Palatine."

The motor driven tanker of today is a highly specialized vessel which is designed to move a great volume of petroleum at maximum speed and with minimum delay at loading and unloading ports. A few years ago three days was considered a quick "turnaround" for a tanker. Today, with modern pumping equipment, a tank ship turns around in twenty-four hours. That is to say, twenty-four hours after she arrives in port she has taken on or discharged her cargo and is again at sea. Consequently the modern tanker is moving practically all the time and, more than any other type ship, is the actual home of her crew. To compensate for the more continuous service, the crew is accommodated in a style that would turn the average land green with envy. Nothing is overlooked to provide complete comfort and the sailors enjoy quarters and cuisine that compare favorably with passenger accommodation on many liners.

The Imperial Oil fleet now comprises nine large ocean-going motor tank ships: the "C. O. Sullivan" of 22,175 tons, the "Victrolite," "Vancolite," "Calgarolite," "Montrolite" and "Canadallite" of 15,600 tons; the "Ontarolite" and the "Reginolite" of 12,000 tons, and the "Frontolite," formerly a steam turbine vessel, which was converted into a motor ship, with a tonnage of 9,150. The combined motor tank ships carry 1,045,000 barrels of oil which they load and discharge at an average port time of twenty-four hours. It is estimated that these ships carry for about 25 per cent. cheaper than steamships of corresponding size.

In addition to the ocean tankers Imperial Oil is operating six canal size steam driven ships on the Great Lakes. These move refined products from Halifax to various ports in the Great Lakes and to Port William, serving the Halifax, Montreal and Sarnia refineries. Most of these vessels tie up during the winter but in the summer it is a rare thing for one of them to have more than eight or ten hours in port. On the Pacific Coast the SS "Imperial" and two other steam vessels transport petroleum products for the company, and there is also the small motor ship, the "Marvolite" with a capacity of about 1,000 barrels. The combined capacity of the entire Imperial fleet is approximately 1,100,000 barrels; sufficient to fully load more than 5,300 tank cars, making a train 36 miles long.

The modern ocean-going tank ship contrasts interestingly with the shallow draft river boats which are used by the Imperial interests on the Magdalen River, in Colombia, and which resemble in appearance the old stern wheelers Mark Twain once piloted on the Mississippi.

Huge Merry-Go-Round

Gulf Stream Is As Old As Atlantis Ocean

The huge Gulf Stream, which moves more water than all the rivers of the earth combined, is not changing its course, the National Geographic Society reports, commenting on statements of ship-captains indicating a possible reversal of current.

There has been a gulf stream since there was an Atlantic Ocean and trade-winds to blow on it, the society reports, describing how the winds cause the huge current as an electric fan directed at the surface of a tub of water will cause all the water to swirl about.

The warm waters of the Caribbean Sea, blown westward by the trade winds of the Gulf of Mexico swirl about and seek an outlet in the Florida Straits, whence the stream, 40 miles wide and nearly 3,000 feet deep moves with such momentum north-eastward that it preserves its identity until it reaches Europe.

The Gulf Stream is a merry-go-round of the Atlantic. After it hits the British Isles, helping to provide a mild but foggy climate in that relatively far northern latitude, it divides, and one branch turns south to Portugal, where it strikes the weather-vane trade winds and returns to the Caribbean Sea. Another branch goes north of the British Isles and proceeds, considerably chilled, into the Arctic Ocean.

But for the great stream, England might have the climate of Labrador, and Norway, the bleakness of Greenland.

Record Cheese Shipment

Canadian cheese shipped from Montreal in a single week to foreign markets totaled more than 55,000 boxes, an increase of nearly 20,000 boxes compared with the same week a year ago. Prices paid at country points were records for the year to date.

The prison population of England and Wales has decreased from 20,000 to 10,000 since 1878.

Success in farming in Canada is no longer by any means limited by nationality. This was strikingly demonstrated at the standing grain and good farms competitions conducted recently by the Calgary Board of Trade in co-operation with the Provincial Department of Agriculture.

The prize for the best all-round farm in the district was awarded to Toef Canovsky, of Chatham, Alberta, who emigrated from Hungary a few years ago. This competitor also won the highest honours for a standing field of oats. The second prize winner was Oscar Anderson, from Sweden. The third winners, Messrs Wright and Bond, of Irricana, Alberta, were from the United States; while the fourth, R. Ness, of DeWinton, Alberta, was from England.

Of Toef Canovsky's farm the judges said that it gave an impression of artistic taste combined with utility. The buildings were well built, well kept and arranged according to an intelligent plan, with everything in good order. Further, this Hungarian farmer's livestock was mostly pure-bred, and his fields were absolutely clean and free from weeds.

A Growing Industry

Fish Reduction Plants In B.C. Doing Big Business

The growth of fish reduction plants on the west coast of Vancouver Island is shown in a report of the Dominion Inspector of Fisheries. With the lifting of the ban in 1926 fifteen plants began operations, and a production of 8,481 tons of pickled meal and 1,898,721 gallons of pickled oil were realized. Last season 19 plants were in operation producing 12,115 tons of meal and an oil production of 2,608,190 gallons. The movement in the first year was chiefly to Japan but in 1927 more than 9,400 tons were shipped to Hamburg. The entire production of pickled oil last year was shipped to the United States.

New Insomnia Cure

Lie With Head To North British Doctor Advises

The next time you can't sleep, try lying with your head toward the North Pole, instead of counting sheep, the London Evening Standard advises.

"Sleep with the head north and the feet south," the article said, quoting a physician. "The human body is a magnet through which electrons circulate north or south."

It was explained that, as the electrons originate from the thyroid glands of the neck, when the sleeper lies toward the north the electrons travel south away from the brain.

Announcer—"I simply cannot work this evening." Station Manager—"And why not?"

Announcer—"Because my wife will be listening in—and we're not on speaking terms."

In the Wieliczka salt mines at Cracow there are altars, shrines and statues made of salt.

Louis XIII. often prepared his own food in order to thwart the attempts of enemies to poison him.

TOWN

Life is like a race. Speed up and you cover more ground, but you get to the end more quickly.

No man can cut a wide swath who always has an axe to grind.

Belgians Are Catering To Tourist Trade

American Features Being Installed In Every Coast Resort

Belgium is going to great lengths to attract American visitors. In every coast resort dotted along the sands stretching from the French to the Dutch border the installation of American features is strikingly noticeable.

Soda fountains with a menu that would disgrace the most select inns of Palm Beach, are to be met everywhere. The prices are ridiculously cheap. A banana-split costs only 12 cents, while the most expensive combination can be had for 25 cents.

Grape fruit is as plentiful as in any American town. No longer do the restaurants make a feature of the Continental breakfast. Dejeuner a la Americaine is prominently displayed on the menu.

A stack of panicles and similar phrases are now part of the education of the waters in Belgian hotels and restaurants. One restaurant in Knokke-sur-Mer even featured corn-on-the-cob as part of its fare, a dish extremely difficult to find even in London.

No hotel worthy of the name exists without its American bar. Every known form of cocktail can be procured, shaken in the best style of the American bartender. Salted peanuts and olives adorn the counter. Stools and a foot-rest complete the atmosphere of a saloon in the United States before prohibition days. Central heating is another feature of the hotels.

Manufacture Asphaltic Oil

Imperial Oil Company Erect Plant In Regina For Production Of Oil For Road Making

A new industry got under way in Regina a few days ago when there was erected a \$25,000 plant by the Imperial Oil Company. It is for the manufacture of asphaltic oil, being used for waterproofing gumbo roads in Saskatchewan and also of asphalt for paving and other purposes. The new plant has a capacity of between 300 and 400 barrels of asphaltic oil per day.

Shorter Names Suggested

The Society for the Saving of Time, a newly-founded efficiency organization in France, has decided in favor of the shortening of names. It wants to limit family names to five letters and other names to two. In this way, it is declared, the business world would save millions of pounds in correspondence yearly.

Seems To Be Fair Treatment
A position that ensures a jobless man good comfortable quarters, three square meals a day, and fair remuneration for his labor, is not to be sneezed at. And the high regard which considers farm work beneath his dignity or at variance with his particular ideas of what he wants to do, deserves to be left in the lurch.

Life insurance helps a man to save, then protects his savings; and if he dies prematurely pays not what he has saved, but what he had hoped to save.

The rich get everything. You will notice there was little effort to improve the jails until the upper class began to use them occasionally.

BABY GIRL HAD DIARRHEA WHEN CUTTING TEETH

Mrs. A. J. Murray, Gull Lake, Sask., writes:—"Last summer, my baby girl was cutting teeth and became very weak with the diarrhoea. I didn't know just what to do for her as she couldn't retain anything. At last one of my neighbors said to me, 'Have'n' you say

why, I wouldn't be without it where there are children."
"My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days she was well over the diarrhoea and was running around as well as ever."

CHAPTER I.—Continued

Gillis rose with an embarrassed air. "Here I am talking 'bout you and I travelling together. I guess you're one of them tourist fellows, and I don't suppose you want to go along with a rough-neck like me."

Donald liked this big, bluff Westerner, with his honest face and simple manner. He reached in his pocket and took out the money the sheriff had given him.

"You see that? Well, before this money is gone I'll have to find a job. And it's borrowed money, too."

Gillis studied him carefully. "Well, you got my goat in a way, but there is one thing I do know, and that is that you ain't no slicker. I'm 'bout twice your age, and I know a good deal when I see it. I'll meet you to-morrow mornin' at the station. I'm goin' to start callin' you Donald right now. And what's more, Jack Gillis is your friend from now until hell freezes over. Good-night, Donald."

CHAPTER II.

Two days later Donald and the Westerner boarded a C.P.R. train in Montreal for the West. They were no longer comfortably seated in their section of a tourist sleeper than they began rushing westward through the winter evening.

The days that followed were full of interest to Donald. The train passed West, running on time like a clock. They tore through towns and farming settlements and plunged into forests and hills in the northern part of Ontario.

"The hills dwindled when they reached Manitoba, and in Alberta Donald felt as if he were sailing over a vast sea of land. "We'll see them old Rocky Mounts pretty soon," said Gillis happily. "You'll like B.C. Donald. And after you bin there awhile all hell won't try you loose. I know 'cause I broke away from her twice, but I always drift back. I ain't got the education to tell you the funny feelin' I have when I'm comin' back to her. When I see them big mount'ns loomin' up I feel sort of scrumptious inside, like I wanted to smile at everybody, and I have a hard time to keep from lettin' out a yell."

"Your power of expression needs no apology," laughed Donald. "Forget to tell you that I ain't got right through to the Coast. The Company I work for has a mill at Revelstoke that needs fixin' up. The job'll probably last 'til spring. You better stay off with me, 'cause you'll find

GOOD ADVICE FROM MOTHER OF SEVEN

Recommends Lydia E. Pinkham's Vegetable Compound

Toronto, Ont.—"I began taking Vegetable Compound for nervous and other troubles and I must say I felt different after the first dose. I have been told this last six months that I look twenty-five, although I am now forty-seven and have had seven children. I have taken the Vegetable Compound regularly for some time and sleep well, rise early and feel young."—Mrs. McKie, 13 Laurier Ave., Toronto, Ontario.

W. N. U. 1752

wicket. "By, do you know where I can find an 'easy-weight' that can box a bit?" he said to the agent.

"How about those two I sent you yesterday, Andy?"

The one addressed as Andy made a gesture of disgust. "Those two bighters were as 'cavy as cows. They didn't know their right 'and from their left. I don't want any 'uman punchin' bags, I want a man that 'as a little spite. Blime me, if I was in Australia I could 'get a 'arf a dozen in 'arf a minute."

"I'm your man," said Donald stepping forward.

The small man turned. The keen eyes under the bushy, light-coloured eyebrows studied Donald carefully. "Can you box?"

"I can."

"Good! Come with me."

Donald followed the sturdy little Australian. For a few blocks they walked in silence.

"Ad your dinner?" queried the Australian.

"No."

"We'll 'ave a bite in 'ere."

They turned into "Old Joe's" restaurant.

"Sounds good to me," observed Donald with a pleased smile.

"Deen missin' a few meals, 'ave you? Order what you want," said the Australian, as they sat down to a table.

"I'll warn you that I'm hungry," cautioned Donald.

"Up to it, my lad; about all we get in this 'ol world is what we eat. What's your name?"

"Donald McLean."

"Mine's Andy Petray."

Then Andy delivered himself of the following information: "I'm the manager of Bill Hagin, the Australian 'cavyweight. We are to fight Sluggo Garriean, the Canadian champion, in about two weeks. The Sluggo is well named, as 'e is an 'cavy little 'un, and it takes a good boxer to beat 'im. I want an 'cavy man that can speed Bill up a bit, and I've 'unted this town over, but I can't find one. Now, if you can deliver the goods, you will be worth three dollars a day and your cats. What do you say?"

"I say yes," was the decided answer.

Andy dug into his pocket. "Here's three dollars to bind the bargain."

"Better wait until I earn it," suggested Donald.

"That's all right, me lad; you'll be needin' it to eat on. I ain't worryin'."

"Come to the gymnasium at the corner of Robson and Granville at two o'clock tomorrow," advised Andy as they stepped outside.

"I'll be there, and I want to thank you for your kindness."

"Forget it!" smiled Andy. "I've been flat many a time myself."

"Half an hour ago I was broke and hungry," mused Donald, "and now I'm well fed and have three dollars in my pocket. Great old world this!"

He chuckled happily as he swung down sun-splashed Cordova Street with a buoyant stride.

To Be Continued.

What Will you do

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's a most daily need of its use. For, and any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; no diarrhoea checked. A vegetable product, a baby remedy meant for young folks, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. In many spare you a sleepless anxious night. It is always ready, always safe to use; in emergencies, for every day ailments. Any hour of the day or night that Baby becomes fretful, or restless, Castoria was never more popular with mothers than it is today. Every drugist has it.

Fletcher's
CASTORIA

A Double Escape

DOCTOR'S DAUGHTER'S STORY.

Another Toronto home provides evidence of how a simple cut, scratch or bruise, may pave the way to deadly blood-poison, and how vital is the need for keeping Zam-Buk always handy?

When called upon at 3, Business Avenue, Mrs. J. E. Zealley, daughter of the late Rev. Dr. of St. David's, Wales, said:—"My boy Alfred scratched his leg with the brass tag of a shoe lace. A nasty poisoner soon developed and it defied all the usual ointments. Hearing splendid reports about Zam-Buk, I decided to give it a trial. To my great relief, the pain soon ceased, healing set in. All inflammation and poisonous matter was quickly removed by Zam-Buk, and it healed the sore without leaving a scar."

Again when I fell over a steel fender and injured my knee badly, Zam-Buk, alone saved me. My daughter, a nurse, was of the opinion that only an operation could remove the mass of inflammation and pus. But I again pinned my faith to Zam-Buk, and it cleaned and healed my knee. I also used it on my face and stored Zam-Buk at fifty cents per box. Equally valuable for eczema, pimples, cuts, burns, etc.

Autos Derail Many Trains

What Happens To Car and Passengers Not Hard To Guess

An automobile weighs a ton or two, while a railroad train may weigh a thousand tons, yet in one-year automobiles caused twenty-seven derailments. Probably the whole train was never derailed, but it is surprising that even part of it was forced from the tracks. When this happens to the passengers of the charging automobiles is easy to reason out.

In the same period over ten thousand railway crossing gates were smashed, while many automobiles were stalled on the tracks, and others were demolished by "flying" trains which were not derailed.

Each year thousands of persons are killed and injured at railroad crossings—and practically every death could well be labeled "suicide," for we recklessly persist in taking the American's gambling chance.

The only ways in which one may commit suicide at a crossing are by trying to beat the train, or paying no attention to what is coming along the track.

The driver who obeys bells, warning lights and whistles, and approaches a crossing with both eyes and ears at attention, is the driver who always has to notify the hospital of what happened to the other fellow. Even this is a mean job, but it is the only way to save one's life.

What Happens In Half Second

Speeding Car Travels Ten Feet In That Time

The fastest thing that any man can do is to wink his eye. The instinctive reaction of winking when a cinder blows into the eye is about one-tenth of a second for most people. In that flash of time, an automobile speeding sixty miles an hour will move nearly ten feet. A fast airplane will move more than twenty-five feet. Thus, the pilot can run into a small bird after he has first seen it before he can wink his eye against the expected shock, writes E. E. Fleg in Popular Science Monthly.

Some months ago, a workman fell out of the fifteenth floor of a building in course of construction in New York City. On the thirteenth floor he grabbed a rope hanging from a scaffold and swung himself in on the twelfth floor, saving his life. He afterwards confessed that he was as much astonished by his act as anyone who saw him.

The explanation is that the fall of twenty or twenty-five feet before he grabbed the rope occupied about one second and a quarter, which was time enough for his thinking machinery to issue the orders which made his muscles take hold of the rope below at the proper instant. Had he been placed in equal danger while driving an automobile at sixty miles an hour he would have been killed.

Tests with a group of typical automobile drivers have shown that the average time needed to see a danger signal, realize its meaning and begin to press the brake lever is a little more than half a second. In that time a car traveling at sixty miles an hour would move thirty feet. That distance represents the minimum margin of safety the driver must maintain to avoid accident.

As speeds increase, no remedy for the advancing number of accidents will be found in stricter driving tests or improved warning signals. Devices will have to be found speedier than the human nervous system.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child. The Tablets always do good. They are as safe as sugar, and as effective as any other medicine. The mother can always feel safe in using them.

Concerning the Tablets Mrs. John Armour, R.R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough cathartic which regulate the stomach and bowels, banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

When Asthma Comes do not despair. Turn at once to the help of Dr. D. Kelly's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Coughing, chest breaking becomes natural and without effort. Others thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

Took a Chance

Chance perusal of a newspaper advertisement has brought B. A. Martin, purchaser "sight unseen," of a Vancouver Island farm, all the way from Southern India. Mr. Martin landed in Victoria, accompanied by his wife and eight children, as promising a looking group of new citizens as the Pacific Coast has seen.

Veterinaries use Minard's Liniment.

German youths are not so tall now as in their boyhood days. The general decrease is about 1½ inches.

The principal difference between a "shoppe" and a "shop" is about two bucks per garment.

Don't forget it, that self-pity is the most despicable of all vices.

Anybody who knows his head method. And you will never suffer from excess acid when you prove out this easy ref. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians. One spoonful in water neutralizes the excess of volume in stomach acids, and at once. The symptoms disappear in five minutes.

Many people, two hours after eating, suffer from indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes the excess of volume in stomach acids, and at once. The symptoms disappear in five minutes.

When, in 1918, the Jewess Rosa Kaplan attempted Lenin's life, 800 young Russian officers were executed in Moscow.

Little Helps For This Week

"And the Lord make you to increase and abound at love one toward another, and toward all men." — 1 Thessalonians iii. 12.

If any little word of mine May make a life the brighter, If any little song of mine May make a heart the lighter, God help me speak the little word, And take my bit of singing, And drop it in some lonely vale To set the echoes ringing.

If any little love of mine May make a life the sweeter, If any little care of mine May make a friend's life the fleetier, If any little word of mine May make a burden of another, God give me love and care and strength.

To help my tolling brother, God divided man into men that they might help each other.—Seneca.

Bears Well Behaved

Have Better Manners Than Any Other Wild Animal

The epicurean bears have the best table manners of any wild animal, in the opinion of Scorchum Alarid, who presides at the nightly feasts served to bruins in the park at Yosemite, Cal.

Scraps of food gathered from eating houses of the region are brought to a regular place, where bears are always waiting to be fed.

"Each evening the hungry bruins patiently wait until I have backed my truck containing their food to the platform and have set their table," Alarid said.

"When I empty the scraps on the platform they take their places. They do not guzzle their food and are not in the least disturbed by the thousands of tourists who watch them," he added.

Athletes — Keep Minard's Liniment handy.

Airplane Saved Men

A score of men without food and very little clothing, in a wild part of the Red Lake District, Manitoba, have been saved by airplane, which took emergency rations from Hudson. The plight of the men was caused by a forest fire which destroyed their cabins and supplies.

The principal difference between a "shoppe" and a "shop" is about two bucks per garment.

Don't forget it, that self-pity is the most despicable of all vices.
